

Design-ISO2go-Cup

The eco-friendly design ISO2go cup. Developed by Profi Bariste and created by REICHERT DESIGN, the elegant reusable cup fits under any coffee machine in the catering and also at home. The cup is easy to use via a new and intelligently designed closure technology and the optimized drinking opening gives you a new type of drinking haptics (button design). The practical one-handed operation and the drinking ergonomics (nose free when drinking over thoughtful design down to the last detail) complete the great design. No additional cup cuff is necessary even for very hot drinks and keeps coffee or tea up to 30 min. warm. The cup can be printed in up to 5 colours and we guarantee at least 500 flushes on the durability of articles and decoration in household and industrial dishwashers – so the Design ISO2go Cup is sustainable and can be used for a long time. The rocker can be removed by simply pressing on the back for cleaning.

Other product benefits:

- environmentally friendly - reusable
- filling volume up to 300 ml - also with milk foam (calibration marking in the tool at 0.25 L)
- simple one-handed operation
- label "on/off" also in Braille font

Available standard colors on request.

- approved by BGA and FDA
- free of bisphenol-A
- environmentally friendly - reusable
- dishwasher-suitable
- inner side of the cup with pearlgloss-finish for easy cleaning
